EUROPTI

SPACIOUS, DURABLE, SIMPLE, SAFE AND STABLE

The Topaz EUROPTI has a deceptively spacious cockpit capacity. She can be sailed singlehanded by very young sailors but also has comfortable capacity for two children or an adult and child to sail together.

The TRILAM construction produces a supremely durable hull with high levels of buoyancy. She is virtually indestructible and maintenance free. At just under 40kg, the hull is also impressively lightweight making the boat manageable for even the youngest of sailors.

Everything on the Europti is aimed at the young sailor. Not only on the water but also ashore. The EUROPTI is a very simple sailboat that is instantly accessible for total novices from as young as six years old.

She is reassuringly stable and incredibly simple to sail. The Europti also rows easily, the positions for the rowlocks are already moulded in.

On shore the boat is extremely simple and quick to rig. The light hull weight is also a benefit on land and the boat is easily carried by its gunwhale.

FEATURES

- The thwart, centreboard case and buoyancy tanks are connected to each other to ensure ultimate stiffness.
- The cockpit floor is supported by a spin weld turret.
- The bottom is reinforced with three ribs for extra stiffness and to help protect against wear and tear.
- A rubber stop at the back of the centreboard case prevents damage to the centreboard when running aground.
- A central eye in the bow makes for easy towing.
- Moulded-in stainless steel rods are used to fasten mainsheet block and toe straps.
- The Europti is self bailing via two holes in the transom that can be sealed by rubber balls. This also enables you to rinse the boat out easily.
- The Europti is supplied with an easy to use sleeved sail for total beginners or a simple racing sail for more skilled young sailors.

THREE LAYER SYSTEM

The trilaminated structural polyethylene construction, with a lightweight honeycomb core, ensures toughness without increasing hull weight:

- Hardseal Metalicene® inner skin
- Light weight extra strength honeycomb core
- Exceptionally strong, Metalicene® outer skin

MATERIALS

The Topaz Europti is moulded in expensive Metalicene® polyethylene. This is the highest quality Superlinear polyethylene available. No other sailboat manufacturer uses as high a grade of polyethylene in their boat production.

It is 41% stiffer and lighter than standard polyethylene which is beneficial to boat speed and performance. It is also 25% tougher than standard polyethylene which makes the boats far stronger. The Metalicene® is also fully UV stabilised.

The quality of the plastic used is an important factor which has a direct bearing on how well the boat sails. A stiff and rigid hull will always perform better. The boat will also be stronger and more durable helping to cut down on surface abrasions and increasing the life-span and resale value of the hulls.

BUILD QUALITY

The precision moulded TRILAM three-ply sandwich is unique to Topper International and guarantees that no other rota-moulded sailboats come even close to the Topaz range in terms of strength, rigidity and durability.

The unrivalled specification of the Topaz range also provides the strongest possible attachment for fittings via brass inserts moulded into the hull structure.

BUILT-IN BUOYANCY

Masses of buoyancy is built in to the ultra stiff hull which is vital to the sailboats responsive performance on the water.

THE ULTIMATE HULL

What you get is a beautiful curvaceous hull that performs like a dream, is virtually maintenance free, comes complete with an impressive three year warranty and, in the unlikely event of an accident, is easy to repair.

| | EUROPTI |
|------------------|--------------------------|
| Length | 2.39m |
| Beam | 1.21m |
| Crew | 1-2 |
| Hull weight | 39kg |
| Construction | Trilaminate Polyethylene |
| Sail Area ex spi | 3.35m ² |
| Mast & Boom | Coated Aluminium |
| Blocks | Stainless Nylon |
| Level | Beginner |
